

HIGH PRESSURE , JOINERS, MUFF COUPLINGS, NIPPLES

adelaide belt & hose

MALE STEMS, GROUND JOINTS and HIGH PRESSURE MENDERS

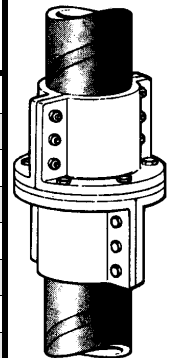

These fittings are used for steam, chemicals and high pressure compressed air applications. The fittings have safety collars for use with high pressure clamps. Ground joints have a soft to hard metal cone-to-cone to give a *washerless* seal.

MUFF COUPLINGS

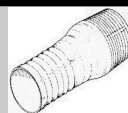

Manufactured using a strong, durable cast iron aluminium alloy construction. The two halves of the coupling bolt together to give a super-strong clamp around the hose. For use with Muff Coupling Hose.
